WORK EXPERIENCE

06.2021 – now (3 years)

- **Frontend Developer** | Redicon - Software House | Olsztyn

Brief job description:

Creating scalable and responsive applications with mobile-first approach, implementing the front-end based on a graphic template, managing new features and components, integrating and configuring CMS. I created over 30 various landing pages and applications. Through this, I have acquired skills in HTML, CSS (including SASS, TailwindCSS, Bootstrap), JavaScript, TypeScript, jQuery, React, Next, PHP, working with a MySQL database, API integration, proficiency in using Photoshop, Figma, Adobe XD, Avocode, project management through Jira, Redmine, and GIT.

→ Creating Wordpress websites from scratch, management, support for Woocommerce,

many popular plugins like ACF, Contact Form 7, plugins and extensions development, SEO optimization, managing databases, technical support to clients

- Introducing new features in JavaScript, strong foundation in writing pure JS, using features from the newest versions of ECMAScript
- Experience in utilizing TypeScript's advanced features such as interfaces, generics to improve code maintainability and scalability, type-safe development
- Command over developing React.js components, Virtual DOM, and workflows, building interactive user interfaces, managing global state
- API development and deployment, API calls, data fetches
- Continuous testing and integration of builds and releases
- Knowledge of using Linux, Windows, git version control, node packages, collaboration and graphic applications
- Writing pure, scalable and simple code using good practices and methods e.g. BEM
